

COMPANY PROFILE

About Us:

HiSolve is a leading IT services provider to its clients worldwide. Since 2002, HiSolve started operating from its headquarters in Santa Clara, USA with offshore development center at Bangalore, Karnataka, India,

From a humble consulting mode during its initial years, HiSolve has evolved constantly to move up the value chain and provide high-end IT services. Services offered include software design, development, training, consulting, and support for software testing, Enterprise Resource Planning (ERP), Data Warehouse and Web. Using a managed offshore development model HiSolve provides high quality and cost effective solutions

HiSolve has built long-term partnerships / relationship with clients, ensuring high value on a sustained basis, leading to mutually beneficial engagements

HiSolve being a quality-focused company has been continuously striving to attain higher Organizational maturity to provide better value to its clients. Our domain skills technology expertise, business and engineering processes ensure that we are dependable business partners to our customers. We nurture a rich cross-cultural work environment that promotes an individual to excel in all respects.

DATABASE Solutions.	4	Solutions for complete Administration Performance management, Capacity management.
ERP Solutions	4	Solutions for implementation
Testing & QA Solutions	4	Complete end to end solutions from analysis, design to implementation and maintenance(white box ,performance,blackbox testing)

*Ratings are on a scale of 5 with 5 being the highest.

Microsoft Technologies

- C#, ASP, ASP.NET, ADO.NET, VB.NET, XML, UML, OOPS
- VB Script, Java Script, Biz Talk, Share point & SQL
- Server 2005, SQL reporting Service

JAVA Technologies

- Core JAVA, J2EE, JSP, EJB, STRUTS, SERVELTS, Springs

Data Base

- Oracle, My Sql, MsSql.

Testing

- Functional Testing
- Automation Testing (QTP & Silk Test)
- Performance Testing (using VSTS, Loadrunner, Webload, Silk Performer).

Storage solutions

- Automated Enterprise Backup Solution:
- LANFree Backup Solution:
- NAS / SAN Solution:
- Information Lifecycle Management Solution

Networking

IT Managed Services

- IT Infrastructure Management Services
- Remote Managed Infrastructure Services
- NOC Inside services
- IT Monitoring
- IT Service Desk
- IT Asset Management
- IP Traffic Analysis

Network Infrastructure Services

- Structured Cabling Services
- Network Integration Service
- IP Telephony
- IP Contact Center
- Network Convergence

- Unified Messaging
- Real-time collaboration
- Network Infrastructure and Optimization Services

Data center solutions

- Data Center Planning & Pre-Design
- Data Center Power & Cooling Systems Analysis
- Data Center Feasibility Studies & Project Cost Budgeting
- Data Center Availability & Risk Assessment
- Data Center Computational Fluid Dynamic Services
- Technology Master Format Planning
- Data Center Site Selection
- Business Continuity & Disaster Recovery
- Data Center Relocation Evaluation & Planning
- Data Center Owners Representation
- Thermography Assessment Service
- Data Center Energy Usage Assessment Service

Telecom & Wireless Infrastructure

- Telecom Equipment Commissioning
- Fast, Flexible Installation
- Complete Base Station Installation
- Switch Room & New Equipment Installation
- System Testing & Integration
- Commissioning & Network Integration
- Next Generation Software/Hardware
- Drive/Walking and Benchmarking tests
- NMS, OSS, NNOC Development & Support
- 3G, GPRS, E911, DACC, LNP, VoIP, ATM Support

Embedded systems-Driver development

- OS Porting
- Windows CE Services
- Embedded Linux Services
- Embedded Linux BSP Development
- Device Driver Development
- Embedded Application Development

Mobile application developments-

- Palm OS
- BREW
- Blackberry
- Symbian
- iPhone
- Windows Mobile
- J2ME

ERP Solutions

- SAP
- Oracle APPS
- Peoplesoft

DATABASE Solutions.

- Oracle/SQL SERVER/IBM DB2/SYBASE/MYSQL
- Remote DBA
- Performance Management
- Backup and Recovery
- High Availability
- Space and Capacity Management, Administration

Mainframe solutions

- z/OS System programming,
- DB2 Administration,
- CICS Systems support,
- Storage support
- RACF Security administration.
- Remote IT staffing

IT Infrastructure solutions

- IT Supply Chain Services
- IT Integration Services
- Asset Management Services

Testing & QA Solutions

- Performance testing
- Whitebox testing
- Configuration Testing
- Test Automation framework.
- Mobile applications& handset testing.
- Embedded & Device driver testing

- Testing tools-Mercury,Borland,Automated QA.
- Software Quality Assurance (SQA)
- Software Quality Assurance Management Consulting

Staffing Services

With an extensive experience, HiSolve has achieved expertise in the field of IT Staff Augmentation services by servicing global clients. Our robust processes / infrastructure are capable of ensuring quick delivery of quality staff HiSolve has a reserve pool of IT talent which helps us fulfill the staffing requirements of clients in a short period of time.

HiSolve's Advantage in providing IT staffing services

Quick Ramp Up

HiSolve can respond & ramp up quickly to fulfill client's requirements. HiSolve has a robust resource management and recruitment process which ensures quick response and quick ramp up

Robust Screening Process

HiSolve technical expertise enables us to have a methodical approach to short listing candidates for staffing assignments. HiSolve also has a dedicated team for background verification. This process ensures that, the staff deployed at the client location has undergone sufficient background verification checks

Ensures Buffer Facility

When the requirements are significant in terms of volumes, HiSolve deploys buffer resources to ensure smooth transition during attrition.

Stability & Reliability Assurance

HiSolve has long term service agreements with its employees and this ensures stability and long term deployment of staff in client projects.
